DETAILED ACTION

Claims 1-20 are pending in this application.

Election/Restriction

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-19, drawn to compounds of formula (I) or (II) wherein X is =CH-, corresponding process of preparation, composition and method of use, classified in class 546, subclass 313+.
- II. Claims 1-2, 5-6, 9-11 and 13-19, drawn to compounds of formula (I) or (II) wherein X is =N-, corresponding process of preparation, composition and method of use, classified in class 544, subclass 242+.
- III. Claim 20, drawn to a process of preparation of a compound of formula (VIII), classified in class 544/546, subclass various.

The inventions are distinct, each from the other because of the following reasons:

The compounds of Groups I-II are drawn to structurally dissimilar compounds. They are made independently and used independently. They would be expected to raise different issues of patentability if a pyridinyl compound of Group I was anticipated, the anticipatory reference would not necessarily render obvious the pyrimidinyl compound of group II or vice-versa. They are not art recognized equivalents, they are separately classified and require separate burdensome searches both in the literature and computer databases.

Groups I-II and III are unrelated, they are drawn compounds and process of preparation of another structurally dissimilar compound. Inventions are unrelated if it can be shown that

Art Unit: 1624

they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions the inventions of Groups I-II have different function or effect as compared to the product of the process of Group III.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Claims are generic to a plurality of disclosed patentably distinct species comprising the species embraced by the generic structural formulae. In addition to election of a single group from above, applicant is required under 35 U.S.C. 121 to **elect a single disclosed species that falls within the elected group**, even though this requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the

Art Unit: 1624

application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
